ICOPAY · Payment Gateway

URL Payment — User Manual

Merchant screens — share payment URL, verify results, daily ops

V2.64 · 2026-07-23

Contents

1. Scope
2. Sign-in
3. Notices
4. Company info — Payment URL
5. Sharing with customers
6. Payment list
7. Quick checks
8. Daily checklist
9. Support

1. Scope

How merchant staff share a public payment link and verify approvals on permitted screens.
Menus follow HQ Policy → Access. Hidden menus need HQ/distributor grants.
Does not cover API keys or integration specs — ask HQ for Merchant API launch docs.
PG names stay neutralized as ICOPAY on merchant/buyer UI.

2. Sign-in

1) Sign in 2) Sidebar shows permitted menus only 3) Switch KO/EN/JP/CH/TH 4) Check dashboard if shown

3. Notices

Path: Companies → Notices
Read HQ/distributor announcements (fees, settlement, maintenance, web-pay suspend) after login.

4. Company info — Payment URL

Path: Companies → Company info
Payment URL: public one-time checkout (e.g. https://domain/checkout/{compCode}). Use Copy.
Re-pay URL: saved-card repay (shown only when enabled).
Steps: Company info → Copy Payment URL → paste to SMS/messenger/email/shop → open once yourself.
Note: Off/Suspended web-pay may block the URL.

5. Sharing with customers

1) Share the URL; add amount/product notes in the message if needed.
2) Checkout display follows HQ/merchant settings.
3) New buyers use Payment URL; Re-pay URL only for returning saved-card customers.

6. Payment list

Path: Payments → Payment list (or URL payment list if permitted)
Search by period/status/keyword (order no.). Review approvals, failures, cancels, refunds.

7. Quick checks

· Notice-only page → web-pay / HQ suspend
· Failures → check fail reason; ask HQ Risk dashboard if needed
· Missing menu → ask HQ to open permissions

8. Daily checklist

1 Notices 2 Copy & test Payment URL 3 Today/yesterday approvals & failures 4 Escalate spikes with order ids 5 Avoid misuse of Re-pay URL

9. Support

Ask HQ/distributor for missing menus or web-pay settings. Document version V2.64.
