8. FAQ

1. What is URL Payment?

ICOPAY URL Payment lets merchants send **one public payment link**. Customers open it in a browser, enter amount/product/card details, and pay — without building a separate shop or app.

Customer flow

- Merchant** → Copy Payment URL from My Company Info and share it
- Customer** → Opens link → pays on the ICOPAY checkout page
- ICOPAY** → Processes approval (PG brand stays neutralized as ICOPAY on UI)
- Merchant** → Checks result under Payments → Payment list

Merchant vs HQ

Merchant can do	HQ / Distributor sets
Copy Payment / Re-pay URL	Web-pay (URL pay) on/off or suspend
Share links with customers	Operating PG, input mode, branding
View payment history	Menu permissions, fees, settlement
Read notices & daily checks	Company master data changes

2. Before You Start (HQ activation)

Check	How
Is Payments visible in the sidebar?	If not, request menu permission
Is Payment URL shown in My Company Info?	If missing, ask HQ to enable web-pay

Request from HQ

- Web-pay ON / clear suspend
- Payment list permissions
- Re-pay URL (when PG supports it)
- Company name/address changes

3. **STEP 1** View your Payment URL (View Only)

Menu: Company Management > My Company Info

View-only screen — you can **copy** URLs but cannot edit company settings.

```
https://api.icopay.co.kr/checkout/{merchantCode}
```

If web-pay is off or suspended, the URL may be missing or show a notice page only.

4. **STEP 2** Share the URL with customers

Core merchant-operated task.

Channel	Tips
Messenger / SMS	Paste the link; add amount/product text if needed
Email / invoice	Embed the URL in billing mail
Website / blog	Button or banner link
QR	Generate a QR from the copied URL for store use

Checkout display follows HQ/merchant policy. Buyer UI shows the provider as **ICOPAY**.

5. **STEP 3** Review payment history (View Only)

Menu: Payments > Payment list

- Filter by date, status, order number.
 - Separate approvals, failures, cancels, refunds.
 - For support, note **order id · time · amount**.
-

6. Using Re-pay URL safely

- New customers → Payment URL
 - Saved-card return customers → Re-pay URL (when shown)
 - Do not post Re-pay URL publicly
-

7. Daily checklist

1. Read notices
 2. Copy & self-test Payment URL
 3. Review today/yesterday success & fail
 4. Escalate spikes with order ids
 5. Prevent Re-pay URL misuse
-

8. FAQ

Q. Payment URL is missing.

A. Ask HQ to enable web-pay / clear suspend.

Q. Link opens a notice only.

A. Often suspend/maintenance — check notices and HQ.

Q. Payment failed.

A. Check fail reason in the list; escalate with order id if needed.

Q. Menu not in sidebar.

A. Request Access permissions from HQ/distributor.

Q. Need API integration.

A. This is an ops manual — ask HQ for Merchant API launch docs.
