1. What is Chatbot Payment?

ICOPAY Chatbot Payment is a service where an AI chatbot guides customers through **product introduction** → **order collection** → **payment** in a single conversation flow. Without building a separate shopping site or app, merchants can run online sales, reservations, and payments with just one chatbot URL.

Customer Payment Flow (e.g. Prepaid Sale)

- | | |
|-------------------|--|
| Customer | → Accesses the chatbot URL distributed by the merchant (link click or QR scan) |
| AI Chatbot | → Introduces products registered by the merchant and prompts selection |
| Customer | → Selects product and fills in order information |
| AI Chatbot | → Guides to payment page |
| Customer | → Completes card payment |
| Merchant | → Views order in Order Management screen |

What Merchants Operate vs. What HQ Manages

Merchant Can Do Directly	HQ (Headquarters) Manages
Chatbot operation mode, vertical, reservation settings	Chatbot payment activation / deactivation
Product add, edit, delete	Product registration limit
View order list	Approval email / LINE Notify alert setup
View, copy chatbot URL / QR / embed script	Company basic information changes

2. Before You Start (HQ Activation Required)

Chatbot Payment must be **activated by HQ on your merchant account** before use. Check the following:

Check Item	How to Verify
Is Chatbot Management visible in the sidebar?	If visible, activation is complete. If not, contact HQ.
Is a Chatbot Payment URL shown in My Company Info?	If a URL is displayed, the account is active.

Items that require HQ request

The following cannot be changed by merchants directly — contact your ICOPAY HQ representative:

- Chatbot payment activation / deactivation
- Payment approval email notification setup
- LINE Notify alert setup
- Product registration limit increase
- Company basic info changes (name, address, etc.)

3. **STEP 1** Viewing Your Chatbot Payment Info (View Only)

✦ Menu: Company Management > My Company Info

This screen is **view-only**. Merchants can **view and copy** information on this page but cannot directly modify any settings.

3-1. View and Copy Your Chatbot Payment URL

Once HQ activates chatbot payment, the following URL will be displayed automatically:

```
https://pay.icopay.co.kr/chatbot-pay/{merchant-code}
```

Action	How
Copy URL	Click the Copy button next to the URL field → saved to clipboard
Download QR Code	Click the Save button next to the QR image → downloads as PNG file

If Chatbot Payment is set to disabled by HQ, the URL will not appear. Please contact your HQ representative to request activation.

3-2. Copy the Website Floating Widget Script

To display a chatbot icon on your website, copy the **Chatbot Floating Widget** code from My Company Info:

```
<!-- Example of copied code – paste before </body> on all pages -->
<script src="https://pay.icopay.co.kr/v1/embed-chatbot/{merchant-code}"
  async defer charset="utf-8"></script>
```

On the My Company Info screen, press the **Copy** button to instantly copy the complete code including your merchant code.

3-3. Using the QR Code

- Send the downloaded PNG to a print shop or use it in poster and business card design
- Place on table cards, signboards, and menus inside your store

- Customers scan QR → go directly to chatbot payment page

4. **STEP 2** Chatbot Basic Settings ✓ Merchant Operated

✦ Menu: Chatbot Management > Basic Settings

Merchants can **configure and save** these settings directly.

4-1. Select Operation Mode

Choose the mode that matches your business type and payment timing. The AI will guide customers through the appropriate conversation flow.

Mode	Description	Suitable Industries
Product Sale · Prepaid	Immediate payment after product selection	Online shop, merchandise sales
Product Sale · Postpaid	Order received, payment collected later	Custom orders, B2B supply
Reservation · Prepaid	Immediate payment upon booking	Massage, hair salon, study room
Reservation · Postpaid	Reservation accepted → payment on visit	Restaurant, consulting
Hybrid (Sale + Reservation)	Mix of regular sale and reservation products	Multi-service businesses
Face-to-Face (Sale+Reservation · Postpaid)	Confirm on-site before payment	VIP club, in-person services

4-2. Select Business Vertical

Choose the business type closest to yours so the AI chatbot automatically constructs the right question flow for customers.

Vertical	AI Response Characteristics
General Sale / E-Commerce	Collects product name, quantity, shipping address
Massage (General / Club)	Collects reservation date, time, course, guest count
Restaurant	Collects guest count, date, time, special requests
Consulting / Service	Collects topic, preferred schedule, contact info
Real Estate / Auto Sales	Collects property interest, budget, available visit dates
VIP Club	Membership and reservation course-focused guidance

Business Vertical Notes (Optional): Enter any specific info that must be collected or expressions to avoid. This is reflected in AI responses.

4-3. Basic Business Information

Information the AI references when answering customer inquiries. If left blank, it defaults to the registered company information.

- Business name / Address / Phone number
- Business hours
- Additional notes (parking, transit directions, etc.)

4-4. Reservation Settings (for Reservation Mode)

Setting	Description
Default Reservation Slot (min)	Booking time unit: 15 / 30 / 45 / 60 / 90 / 120 / 180 / 240 minutes Individual products can override this in Product Management
Reservation Timezone (IANA)	Reference timezone (default: <code>Asia/Seoul</code>)

If a time slot already has a booking, the AI automatically suggests alternative times. Duplicate bookings are blocked automatically by slot unit.

5. **STEP 3** Product Management ✓ Merchant Operated

✦ Menu: Chatbot Management > Product Management

Merchants can **add, edit, and delete** products directly.

5-1. Product Types

Type Code	Description
SALE	Regular sale product — purchased by quantity
RESERVATION_TIME	Time reservation — specify date and time
RESERVATION_PLACE	Place reservation — book a specific space (room, seat, etc.)

Available product types may be restricted by HQ policy.

5-2. Product Registration Fields

Field	Required	Description
Product Name	Required	The name the AI chatbot introduces to customers
Price	Required	Payment amount (merchant's base currency)
Product Description	Optional	Detailed description used by AI in responses
Product Image	Optional	Up to 1–4 images (limit set by HQ policy)
Quantity Limit	Optional	Enter for inventory management
Reservation Slot (min)	Res. only	Individual slot override if different from Basic Settings
Sale Period	Optional	Set start and end dates for limited-time sales
Active Status	Required	Inactive products are not shown to customers in the chatbot

The number of products per merchant is limited by the **Product Registration Limit** set by HQ.
Delete unused products or request a limit increase from HQ.

6. **STEP 4** Distributing the Payment URL

Distribute the URL, QR code, and embed script you obtained in STEP 1 to your customers.

6-1. Direct URL Sharing

```
https://pay.icopay.co.kr/chatbot-pay/{merchant-code}
```

Channel	How to Use
KakaoTalk / LINE	Send as a link in messages to customers
SNS Profile	Register as profile link on Instagram, Facebook, etc.
Email Signature	Insert link in email footer signature
Website Button	Set "Order Now" / "Book Now" button href to this URL

6-2. QR Code Print Materials

Use Case	Examples
Inside the store	Table QR cards, counter signage
Printed materials	Posters, banners, menus, flyers
Business cards	QR on the back of business cards

6-3. Website Floating Widget

When customers visit your website, a chatbot icon automatically appears at the bottom. Paste the script code copied in STEP 1 before the `</body>` tag on all pages of your website.

7. **STEP 5** Viewing Orders (View Only)

✦ Menu: Chatbot Management > Order Management

The Order Management screen is **view-only**. Merchants can view order details and customer information but cannot modify or delete orders.

Order Information Available to View

Field	Description
Order Number	ICOPAY-generated order identification number
Customer Name / Contact	Information entered by the customer during chatbot order
Product Name / Quantity	Ordered product and quantity
Order Memo	Special requests or notes entered by the customer in the chatbot
Reservation Date/Time	Selected date and time for reservation-mode orders
Payment Status	Pending / Completed / Cancelled, etc.

Payment History

- View approved payment amounts, card info, and approval numbers in detail
 - Filter by date range and status
 - Excel download supported
-

8. Operation Mode Flow Summary

Prepaid Mode — Immediate Payment

- Customer** → Accesses chatbot URL
- AI** → Introduces products registered by the merchant
- Customer** → Selects product + fills in order information
- AI** → Guides to payment page → card payment completed
- Merchant** → Views order in Order Management (email/LINE alert if configured by HQ)

Postpaid Mode — Order Received, Pay Later

- Customer** → Accesses chatbot URL → selects product and submits order info
- Merchant** → Checks order in Order Management → contacts customer
- Payment** → Processed separately (on-site, bank transfer, etc.)

Reservation Mode — Select Date & Time

- Customer** → Accesses chatbot URL
 - AI** → Shows available dates and times (based on slot setting in Basic Settings)
 - Customer** → Selects date, time, guest count + fills in personal info
 - Prepaid** → Immediate payment → reservation confirmed
 - Postpaid** → Reservation accepted → payment on visit
 - Merchant** → Views reservation date/time and customer info in Order Management
-

9. Frequently Asked Questions (FAQ)

Q. The Chatbot Management menu is not visible in the sidebar.

A. HQ has not yet activated chatbot payment for your merchant account. Contact your ICOPAY HQ representative to request activation. Merchants cannot change this setting directly.

Q. No Chatbot Payment URL is shown in My Company Info.

A. This means chatbot payment is currently set to disabled by HQ. The URL only appears after HQ activates it. Please contact your HQ representative.

Q. I want to edit my company information.

A. My Company Info is **view-only** for merchants. If you need to update any information, please contact your ICOPAY HQ representative.

Q. I want to receive email or LINE notifications when payments are approved.

A. Notification settings cannot be changed by merchants directly. **Contact your HQ representative** and provide your email address or LINE Notify token to have it configured.

Q. I registered a product but it's not showing in the chatbot.

A. Check the product's **Active Status** in Product Management. Inactive products are not shown to customers. Also check that the current date falls within any configured sale period.

Q. Can overlapping reservations be made?

A. If a time slot already has a booking, the AI automatically suggests alternative times. Duplicate bookings are blocked automatically by the slot unit configured in Basic Settings.

Q. I can no longer register new products.

A. You have reached the product registration limit set by HQ. Delete unnecessary products or contact HQ to request a limit increase.

Q. I want to edit or delete an order.

A. Order Management is **view-only** for merchants. If order changes are needed, please contact your ICOPAY HQ representative.

Q. Can the chatbot respond to customers in multiple languages?

A. ICOPAY Chatbot automatically responds in the customer's browser language. Multilingual support (Korean, English, Japanese, Chinese, Thai, etc.) is available without any additional configuration.
