Audience: HQ Admin | Published: June 2026

HQ Admin Access Restrictions

HQ Admin cannot access the following menus. Contact the Super Admin for these functions.

- **HQ Settings** — No access
- **Settlement Mgmt** — Integrated Settlement, Run Settlement, Distribute Settlement, Pending Settlement: No access
- **Notification Management** — No access (includes Notify URL and alert settings)
- **User Management** — Menu item order management: No access
- **Operations Management** — Operations Mgmt, TAX Report, Verification Report, Agency Transaction History: No access
- **Deploy Settings** — Only API Documentation accessible; all other deploy menus: No access
- **Split Pay Management** — Email Settings: No access

- 1. Merchant Registration
- 2. Fee Settings
- 3. Web Payment Setup
- 4. Subscription Payment Setup
- 5. Re-purchase Payment Setup
- 6. URL Split Payment Setup
- 7. Chatbot Payment Setup

1. Merchant Registration

📌 Menu: Merchant Mgmt > Register Merchant / Merchant Info

- ① Go to **Merchant Mgmt > Register Merchant**
- ② Enter basic info — name, registration number, representative, contact, email, address
- ③ Configure settlement structure — cycle, fee rate, bank account
- ④ Activate desired payment services
- ⑤ **Save** → merchant code auto-generated → review payment URL
- ⑥ Create merchant account (ID + temp password) and deliver to merchant

Service	Activation Field	Notes
Web Payment	Web payment enabled Y/N	ChillPay integration
Subscription	Subscription enabled Y/N	Plan setup required
Re-purchase	Re-purchase enabled Y/N	Reuses saved payment token
Split Payment	Split payment enabled Y/N	Contract setup required
Chatbot Payment	Chatbot payment enabled Y/N	Additional setup in Chatbot Mgmt

Setting a service to Y shows its URL in the merchant portal. N hides the URL.

Note: Menu item order management within User Management is Super Admin only.

2. Fee Settings

ICOPAY uses a two-tier commission structure: **Base Policy Fee** (system-wide default) and **Per-Merchant Individual Fee** (merchant-specific).

Fee Type	Menu Path	Accessible
Base Policy Fee (system default)	HQ Settings > Fee Settings	??/td>
Per-Merchant Individual Fee	Merchant Mgmt > Fee Management	??/td>

??뵐 Base Policy Fee (HQ Settings > Fee Settings) ??No Access

HQ Settings is exclusive to the Super Admin. Contact the Super Admin to update base fee policies.

2-1. Per-Merchant Individual Fee

📌 Menu: Merchant Mgmt > Fee Management

Configure a custom fee rate for a specific merchant that differs from the system default.

??/span>Go to Merchant Management > Fee Management

??/span>Select the merchant to configure

??/span>Enter per-payment-method individual fee rates

??/span>Set validity period (start ~ end date) for promotional rates

??/span>Save ??applied immediately to that merchant only

Field	Description
Merchant fee rate	Custom fee rate differing from the base policy (%)
Per-method setting	Individual rates for Credit card / Debit / QR, etc.
Validity period	Time-limited fee condition
Fee history	View fee change history per merchant

A per-merchant fee **overrides** the base policy fee once set. Merchants with no individual fee follow the base policy fee automatically.

3. Web Payment Setup

📌 Menu: Merchant Mgmt > Merchant Info > Payment Settings tab

- ① Select merchant in Merchant Mgmt > Merchant Info
- ② Set **Web payment enabled** to Y
- ③ Save → URL auto-generated (`https://icopay.co.kr/pay/{merchant-code}`)
- ④ Share URL with merchant

🔒 **Notify URL setting is Super Admin only.**

HQ Admin cannot access Notification Management. Request changes from the Super Admin.

- Filter transactions by date, merchant, payment method, status
- Process refunds from transaction detail
- Re-send receipt email

4. Subscription Payment Setup

✦ Menu: Merchant Mgmt > Merchant Info > Payment Settings tab

- ① Set **Subscription enabled** to Y and save
- ② Configure plan: name, billing cycle (monthly/yearly), amount, currency
- ③ Share subscription URL with merchant
- ④ System auto-charges per configured cycle

Tokenizes the card on first payment, then auto-charges each cycle.

5. Re-purchase Payment Setup

✦ Menu: Merchant Mgmt > Merchant Info > Payment Settings tab

Re-purchase lets customers reuse a saved payment token without re-entering card details.

- ① Set **Re-purchase enabled** to Y and save
- ② Checkout shows "Pay with saved card" option
- ③ Customer selects re-purchase → instant payment via saved token

Security: Card tokens encrypted per PCI-DSS. Actual card numbers not stored.

6. URL Split Payment Setup

✦ Menu: Split Pay Management

🔒 **Split Pay Mgmt > Email Settings is Super Admin only.**
HQ Admin cannot access email template/SMTP settings.

- ① Set **Split payment enabled** to Y and save
- ② Split payment URL visible in merchant portal
- ③ Create split contract for merchant in Split Pay Management

✦ Menu: Split Pay Mgmt > Register Contract

- ① Select merchant
- ② Set total amount and installments (e.g. $300,000 / 3 = 100,000 \times 3$)
- ③ Set due date per installment
- ④ Save → per-installment payment URLs auto-generated
- ⑤ Share each installment URL with customer via email/SMS/link

7. Chatbot Payment Setup

✦ Menu: Chatbot Management

✓ **Chatbot Management is fully accessible to HQ Admin (including delete).**

- ① Set **Chatbot payment enabled** to Y and save
- ② Chatbot Management → select merchant → choose operation mode
- ③ Set product slot limit
- ④ Share chatbot URL (<https://icopay.co.kr/chatbot-pay/{merchant-code}>) with merchant

Mode	Description	Payment Timing
SALE_PREPAID	Sale — Prepaid	Payment at order, then goods delivered
SALE_POSTPAID	Sale — Postpaid	Goods delivered first, billed afterward
RESERVATION_PREPAID	Reservation — Prepaid	Full payment at reservation
RESERVATION_POSTPAID	Reservation — Postpaid	Confirmed, pay on-site
HYBRID_RESERVATION_PREPAID	Hybrid — Prepaid	Deposit prepaid, balance later
FACE_TO_FACE_POSTPAID	Face-to-Face — Postpaid	Service then payment link sent

 **LINE Notify and email notification settings are Super Admin only.**

HQ Admin cannot access Notification Management.
